

In the Claims:

Please cancel claims 27-28 and amend claim 7 as follows.

7 (presently amended). Immunocoprocytes isolated from exfoliated colonocytes obtained from fecal matter with a yield of about 8-10 million living colonocytes per gram of fecal matter, said immunocoprocytes being cells that express [expressing] immunoglobulins selected from the group consisting of IgA, IgC, CFc, and a combination thereof.

8 (previously presented). The immunocoprocytes of claim 7 expressing IgA and CFc.

9 (previously presented). The immunocoprocytes of claim 7 expressing CFc.

26 (previously presented). The immunocoprocytes of claim 7 expressing a chimeric immunoglobulin Igc.
